

About the Author

Larry James Stevens grew up in the foothills of Studio City, California, as the son of an inventive genius who introduced him to multiple ways of perceiving any sensed experience...rather than only *reacting* to input and opportunities. Thomas A. Stevens, a trouble-shooting expert in experimental aircraft design/flight-test work for Kelly Johnson and Lockheed Aircraft's "Skunk Works," in Burbank, California, had a favorite saying: "What you *don't* have in your HEAD, son, you must have in your feet or your pocketbook."

Emulating his father's interest in aviation, Larry completed an intensive 20-month US Navy flight training program and received his coveted *Wings of Gold* on the 5th of May, 1965. During the next three and one-half years, while repetitively flying into and from the many South Vietnamese airfields, Larry encountered several paranormal-like conditions that proved life-extending. After an equal number of years with Western Airlines®, Larry continued what became a thirty-year quest to uncover the mysteries of the extraordinary, or miraculous. Larry's search intensified a metaphysical calling that led to ordainment in 1998 as a Science of Mind & Spirit minister. Today, Reverend Larry volunteers his services with an avant-garde discipline (Holographic Psychology™) that charts Spiritual DNA and the multifarious, underlying components of human potential. Larry additionally volunteers as the North San Diego County Community Coordinator for the Institute of Noetic Sciences (NorCo IONS).

Blending an open-ended (non-dogmatic) scientific and spiritual perspective, Larry, a **quantum heart-shift facilitator** and Spiritual Coach, dedicates his life to the purpose of helping others wake up to their wholeness and *preexisting* potential. "Heaven on Earth exists now," says Larry. "**Acceptance-by-degree** is our vehicle to unlimited love, inclusive harmony, and joyous abundance."
